Approved For Release 2005/11/23 : CIA-RDP80B01554R003400120001-5

12 APR 1978

Dear Kin:

I wish to amplify what I said at the close of the Technology Trends Colloquium. The accommodations and support provided by the Academy were first-rate as I myself saw, as expressed to me by those here responsible for the colloquium, and as expressed by many of the participants.

Your people clearly earned a share in the success of the colloquium. I especially wish to pass on our thanks to Lt. Cynthia Mady who identified and followed through on all arrangements; to Major Christmas, Lt. Gray and all the Marines for the efficient and high-spirited attention they gave to our security needs; and to CWO Mickey Sullivan and Mrs. Darlene Hill for the competent and extra effort they gave to the handling and mail-out of the classified material. Thanks as well to others I may have forgotten to recognize.

Yours,

/s/ Stansfield Turner

Dear Dr. Alexander:

At the close of the Technology Trends Colloquium, I remarked on how impressed I was with the quality of individual contributions which you and others made to that undertaking.

I want to express my sincere appreciation to you for your participation in what I believe will prove to be a landmark event. I hope that we can build on the colloquium to maintain the kind of exchange typified.

Again many thanks.

Yours sincerely,

25X1 Dear

I was impressed at the close of the Technology Trends Colloquium with both the quality of individual contributions and the obvious exchange of ideas which had taken place. Such stimulation and understanding between those who provide the technology and the users is key to the best use of our national strengths.

I want to express my sincere appreciation to you for your active role in what I believe will prove to be a landmark event. I hope that we can build on the colloquium to maintain the kind of exchange typified.

Again many thanks.

Yours sincerely,

Dear Prof. Rowen:

At the close of the Technology Trends Colloquium, I remarked on how impressed I was with the quality of individual contributions which you and others made to that undertaking.

I want to express my sincere appreciation to you for your participation in what I believe will prove to be a landmark event. I hope that we can build on the colloquium to maintain the kind of exchange typified.

Again many thanks.

Yours sincerely,

STANSFIELD TURNER

Dear [REDACTED]

I was impressed at the close of the Technology Trends Colloquium with both the quality of individual contributions and the obvious exchange of ideas which had taken place. Such stimulation and understanding between those who provide the technology and the users is key to the best use of our national strengths.

I want to express my sincere appreciation to you for your active role in what I believe will prove to be a landmark event. I hope that we can build on the colloquium to maintain the kind of exchange typified.

Again many thanks.

Yours sincerely,

TOP SECRET

Approved For Release 2005/11/23 : CIA-RDP80B01554R003400120001-5

DESCRIPTION OF REORGANIZATION  
OF  
INTELLIGENCE COMMUNITY STAFF

25X1 The new Executive Order on Intelligence (#12036) centralizes direction of our national intelligence effort somewhat. At the same time it preserves the strong and legitimate interests of the military in national intelligence. Thus the Order gives the DCI authority to task all of the agencies of the national intelligence community that collect intelligence data, but leaves management control of those presently housed in DOD -- the NSA [redacted] [redacted] -- in DOD. The objective is to achieve greater coordination of effort and greater efficiency through more centralized direction of the total collection effort.

The Order directs that this be accomplished through the formulation of a National Intelligence Tasking Center (NITC). We propose to form this Center by dividing the existing Intelligence Community Staff into two roughly equal segments. One, a proposed new office, to be titled Deputy for Collection Tasking, will be built around the existing "collection committees," one each for HUMINT, SIGINT and imagery. The committees today transmit the DCI's tasking requirements to the Program Managers who conduct the day-to-day collection operations (except for HUMINT Committee, which will gain four (4) positions for this purpose). Analysts who need information contact the committees with their requests and the committees sort out priorities before passing the requirements on to the appropriate Program Managers. This process will remain substantially intact.

25X1 What is lacking under present conditions is any mechanism for ensuring that all possible collection systems are equally considered. That is, if a collection requirement is given to one of the committees, it will consider its systems only and the customer must then canvas the other committees as well. Duplicatory competition or failure to take full advantage of alternative capabilities frequently occurs. The new NITC will establish a number of geographically and topically oriented teams to address the question of what mix of HUMINT, SIGINT and imagery will best meet a given collection requirement. These teams, in short, will attempt to ensure that the optimal mix of resources is applied, neither overlooking nor wasting resources. The NITC will develop "strategies" or plans for bringing collection assets to bear on a problem. They will provide these to the three committees who will in turn respond to customer requests within those guidelines. An additional [redacted] positions are requested for this function.

That portion of the NITC which concerns itself with managing collection assets during time urgent crises will be located in the Pentagon. It will share facilities and personnel with the Pentagon's Collection Control Facility (CCF) which handles the military input into national collection as well as managing tactical collection efforts. Thus the CCF/NITC combination will be an ideal locale to monitor the national tactical interface in its operational aspects.

Additionally the Deputy for Collection Tasking will be an advisor to the DCI on how well the technical capabilities of existing systems are meeting these requirements levied to the DCI, and on what collection systems would best help to meet those requirements in the future. In short, from the point of view of the collection of intelligence only, this office will advise the DCI on how well he is doing and how he might do better. An additional [ ] positions are requested for this function.

25X1

[ ] positions are requested for the immediate office of the Deputy for Collection Tasking, which includes an office for receiving policy guidance from the DCI and translating it into actions, and an office of administration support. The entire office would total [ ] of which [ ] already exist and would be transferred in from the Intelligence Community Staff.

The other part of meeting the requirements of the new Executive Order is to match the remaining half of the IC Staff with the new DCI authorities for budgeting. These authorities are to: prepare the National Foreign Intelligence Program Budget (NFIP) for presentation to OMB and the President; to defend that budget before Congress; to manage all reprogramming requests; and to monitor disbursements. It is proposed that this staff would be called the Deputy for Resource Management. This separation of the budget function from the collection function is a natural evolution of the Intelligence Community concept. The two functions have been housed together in the IC Staff, but in effect handled separately. Moreover, having them separate will permit the Deputy for Resource Management to check on the budgetary efficiency of the collection side of the community as objectively as he does on the production side.

Finally, this organizational arrangement provides the DCI with one Deputy for each of the basic functions of intelligence--collection and production--and a third Deputy for overseeing the allocation of resources to and between them.

[ ] additional positions are requested for the Deputy for Resource Management to handle the added budgetary functions enumerated above. A further [ ] positions are requested to

establish an Intelligence Community office to oversee the burgeoning investments in automatic data processing (ADP). There is an urgent need to ensure that there is ADP compatibility, lack of duplication and full cooperation between the various national intelligence agencies. This office will be a community monitor of all ADP activities.

DCI TALKING POINTS

FY 1978 Reprogramming of Staff Functions

The specific authorities for which I am formally requesting your approval are as follows:

25X1 • Utilization of [ ] positions from the IC Staff authorization and related funds for the Imagery, SIGINT, and Human Resources Collection Committees to establish the new National Intelligence Tasking Center. In addition, three positions and related funds for the Security Committee would be transferred to the CIA. Finally, the residual [ ] positions--the nucleus of the Resource Management Staff--  
25X1 will be augmented by [ ] positions, and the National Intelligence  
25X1 Tasking Center augmented by [ ] positions and related funds. This  
25X1 augmentation is needed in order to provide the first increment of adequate staffing for the full range of Community functions envisioned by the new Executive Order and as described in my recent appearances before Congressional Committees responsible for appropriations and oversight.

25X1 • Reduction of the CIA's present ceiling by a net of [ ] positions to provide the [ ] additional position requirements for the National  
25X1 Intelligence Tasking Center (giving it a total FY 78 ceiling of [ ]) and the [ ] positions for the Resource Management Staff (giving it a total  
25X1 FY 78 ceiling of [ ]).

25X1 The [ ] positions requested for the Resource Management Staff will be utilized to implement the expanded budget responsibilities explicitly charged to me under Executive Order 12036 and to create an Office of Community's ADP and telecommunications efforts so strongly urged by the Congress in recent years.

I believe this proposed use of FY 78 funds appropriated under Title VIII represents full compliance with both the letter and spirit of that Title. Moreover, the added spaces and associated funds which I propose to derive from CIA accounts represents the net requirement involved in creating this new organization--the NITC--which was not envisioned when Title VIII was passed.

FY 1979 Budget Amendment

The FY 1979 budget currently being considered by the Congress requests [ ] Further, this funding level accommodates only [ ] man-years or personnel effort. The reduction in effective manning was made in anticipation, at the time the budget was prepared, of the need to create the National Intelligence Tasking Center.

EXECUTIVE OFFICE OF THE PRESIDENT  
OFFICE OF MANAGEMENT AND BUDGET  
WASHINGTON, D.C. 20503

April 28, 1978

Admiral Stansfield Turner  
Director of Central Intelligence  
Washington, D. C. 20505

Dear Admiral Turner:

The President has approved your proposed reprogramming of personnel and resources in 1978 and your proposed 1979 budget amendment to provide for the increased responsibilities assigned to you under Executive Order 12036. I have, in the enclosed letter, requested consideration of these proposed actions by the appropriate committees of the Congress. I trust they will take prompt and favorable action to accommodate to your increased responsibilities.

Your staff has been extremely helpful in providing details on the sources of both the funds and positions as well as on the proposed funding and staffing of the Resource Management and Collection Tasking staffs. In approving this request, our staffs have mutually agreed that the positions to be eliminated and the new positions to be created will be at comparable grade levels and that the current authorizations for National Foreign Intelligence Program supergrade and Executive Pay level positions will not be increased. Given the current exceedingly high grade structure in both the Intelligence Community Staff and the Central Intelligence Agency, I would anticipate no difficulty in remaining within these limits. I trust you will give this matter your personal attention.

Sincerely,

W. Bowman Cutter  
Executive Associate Director  
for Budget

STATUS OF REPROGRAMMING AND  
BUDGET AMENDMENT

- o PRESIDENT HAS APPROVED BUDGET AMENDMENT WHICH ALLOWS CREATION OF RMS AND C/T.
- o WE ARE CURRENTLY COMPILING THE DETAILED BACKUP JUSTIFICATION MATERIAL MENTIONED IN THE OMB LETTER TO YOU:
  - FINAL DETAILS NEED TO BE WORKED OUT ON THE PRECISE SOURCE OF BILLETS BEING PROVIDED BY DOD
  - PROGRAMMATIC IMPACT OF THE BUDGET AMENDMENT NEEDS TO BE WORKED OUT WITH THE DOD ELEMENTS WHICH ARE THE SOURCE OF SOME OF THE FUNDS (ABOUT ).
- o THE PROCESS IS SOMEWHAT COMPLICATED BY THE FACT THAT THE BUDGET FOR FY 1979 IS IN VARIOUS STAGES OF MARKUP BY AUTHORIZATION AND APPROPRIATION COMMITTEES.
  - THERE IS ALWAYS THE POSSIBILITY THAT WE MAY BE OFFERING ITEMS WHICH HAVE ALREADY BEEN CUT BY BOTH HOUSES.
  - I AM ALSO OBLIGATED TO REMAIN WITHIN THE OVERALL FUNDING LEVELS SET BY THE PRESIDENT FOR THE NFIP.
  - HAD THE EXECUTIVE ORDER BEEN IN HAND AT THE TIME THE BUDGET WAS FINALIZED, THE FUNDS AND MANPOWER WOULD HAVE BEEN INCLUDED AND YOU COULD HAVE BEEN DEALING WITH A HIGHER INITIAL REQUEST.
  - ALTERNATIVELY, THESE FUNDS AND MANPOWER WOULD HAVE DISPLACED ITEMS INCLUDED AT THE MARGIN, MANY OF WHICH YOU HAVE PLACED AT RISK IN YOUR MARKUP.
  - IT WOULD, THEREFORE, NOT BE UNREASONABLE TO SEE THE CHANGES OFFSET AGAINST MARKS YOU PROPOSE.

5 May 1978

Stan,

*Thanks Let's stick all for now*

It occurred to me in reading your draft message to all Chiefs of Station that it is difficult to cover this subject matter completely without some mention of our difficulties in protecting information both in the ITT case and in our dealings with our own congressional oversight committees. I think that the omission of some comment on these two issues will be noticed by recipients of your cable. For that reason, let me suggest the following change in paragraph 7:

7. We must all be concerned about leaks and do all we can to prevent them. At the same time we must accept the fact that in spite of our best efforts there will continue to be the inadvertent remark, the mistake or other untoward event that results in an exposure of something we would prefer not to be revealed. We need to be more alert to maintain and improve our security. In addition, we are faced with some situations in which it is difficult to exert control. Our dealings with our congressional oversight committees has the effect of placing our sensitive information outside the control of the Agency. In this context, we work closely with those committees to maintain the confidentiality of the information we provide to them. In the case of the ITT/Chile trial, we are faced with the problem of the disclosure of confidential information as part of a government case being brought against the ITT officials. In this case, we are working closely with the Attorney General to minimize the damage that the disclosure of our operations. At the same time, it is

Approved For Release 2005/11/23 : CIA-RDP80B01554R003400120001-5

Washington, D. C. 20505

reassuring for me to be able to report to you that the highest authorities in our government are directly interested and involved in maintaining our ability to protect our sources and methods. I would welcome any comments or recommendations you may have. I know that you will keep plugging to reassure our friends and allies, and you can rest assured that we will keep plugging here to prevent unauthorized releases. I believe we should exhibit external confidence and maintain internal vigilance.
